

SSI CERTIFIED TRAINING

SSI Certified Training is a comprehensive training program designed by SSI for its ShipConstructor and EnterprisePlatform software. For consistency, the training has been standardized to be the same around the world. All training is hands-on in SSI's Training Project and consists of completing realistic activities and exercises directly related to ship design and engineering. Certifications may be earned for various levels of proficiency and then used as evidence of competency.

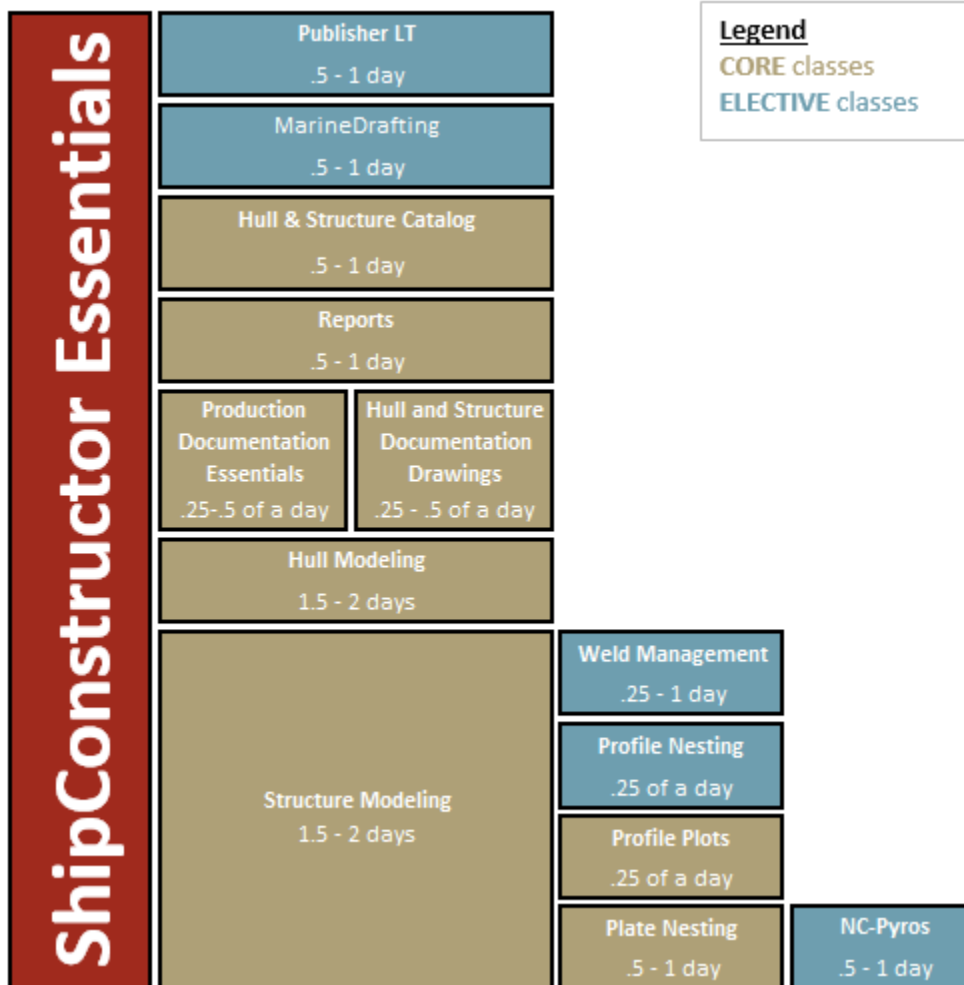

Certifications Available

			
SHIPCONSTRUCTOR ESSENTIALS	SSI CERTIFIED USER	SSI CERTIFIED PROFESSIONAL	SSI CERTIFIED SPECIALIST
FREE! For completion of activities in Essentials Booklet.	For successful completion of any single class.	(Hull and Structure OR Outfitting) For successful completion of ALL CORE classes in either the Hull and Structure Course or the Outfitting Course + 2 Elective classes in the Course.	(Hull and Structure OR Outfitting) For successful completion of ALL CORE classes in either the Hull and Structure Course or the Outfitting Course + ALL Elective classes in the Course.

Validity: SSI will only give certifications after all lessons have been completed correctly. To ensure that skills are up-to-date with the latest innovations and improvements in the software, certifications are only valid for the last three major releases of ShipConstructor software.
